PROFESSIONAL SUMMARY

Results-driven DevOps Engineer with 3 years of experience in CI/CD pipeline automation, cloud infrastructure management, and production support. Hands-on expertise with GitHub Actions, Azure, and AWS, with a strong background in SLA-driven incident management, change management, and cross-functional team collaboration. Proven ability to streamline release processes, reduce deployment failures, and drive operational efficiency.

TECHNICAL SKILLS

CI/CD & Automation: GitHub Actions, GitHub Copilot, Shell Scripting, YAML Pipelines

Cloud Platforms: Microsoft Azure (AZ-900, DP-900), AWS (DevOps), Azure DevOps

Infrastructure & Config: Docker, Linux Administration, Environment Configuration, Release Management

Monitoring & ITSM: ServiceNow, Incident Management, Change Management, SLA Tracking

Scripting & Query: Bash, PowerShell, SQL

Practices: Production Support (L2/L3), Root Cause Analysis, Post-Release Validation

PROFESSIONAL EXPERIENCE

DevOps Engineer

June 2023 – Present

COGNIZANT Technologies | Hyderabad, India | Life Sciences Domain

- Design, build, and maintain CI/CD pipelines using GitHub Actions to automate build, test, and deployment workflows across multiple environments.
- Manage cloud infrastructure on Azure and AWS, including provisioning, access control, and cost monitoring.
- Handle L2/L3 production incidents and change requests within defined SLAs using ServiceNow; perform root cause analysis (RCA) for recurring issues.
- Collaborate with development, QA, and infrastructure teams to coordinate production deployments and post-release validation.
- Manage environment configurations, secrets, and deployment variables across Dev, UAT, and Production environments.
- Lead Cutover Activities during large-scale migration projects; ensure zero-downtime releases through pre-deployment checklists and rollback plans.
- Develop reusable automation scripts (Bash/PowerShell) to reduce manual effort in routine operations and monitoring tasks.
- Implement and enforce branching strategies, code review gates, and deployment approval workflows in GitHub.
- Monitor pipeline health, build metrics, and deployment frequency; proactively identify and resolve bottlenecks.

KEY ACHIEVEMENTS

- Maintained 99%+ SLA compliance across all production support incidents and change requests.
- Reduced average deployment time by automating pre/post deployment validation steps via GitHub Actions.
- Improved MTTR (Mean Time to Resolve) by developing a library of reusable automation and diagnostic scripts.
- Supported multiple production releases with zero major incidents through rigorous pre-release checklists and rehearsals.
- Successfully led Cutover Activities during a large-scale platform migration with no production downtime.

CERTIFICATIONS

- GitHub Actions Certified
- GitHub Copilot Certified
- Microsoft Certified: Azure Fundamentals (AZ-900)
- Microsoft Certified: Azure Data Fundamentals (DP-900)
- AWS Certified DevOps Engineer

EDUCATION

Bachelor of Technology (B.Tech) | Electronics and Communications Engineering (ECE) | 2022
MVGR College of Engineering (MVGRCE), Vizianagaram

CERTIFICATIONS

- Actively participated in blood donation camps and social outreach (CSR) programs, contributing over 100+ hours towards social impact initiatives.
- Contributed to community-driven educational support activities for children.
- Volunteered in awareness programs and team-organized social initiatives.
- Participated in wellness awareness programs, including fitness challenges, mental health campaigns, and health screening camps.
- Currently representing as a member of the Corporate Cricket Team, for Hyderabad location.
